AI Suggestions

Kaviya has a strong foundation and relevant projects for this role, especially given it's for a fresh graduate

1. Missing Skills (from Job Description)

While Kaviya's resume demonstrates strong capabilities and potential, here are a few areas explicitly mentioned in the job description that are missing from your resume:

1. **Generative AI Models (like GPT):**

* **JD:** "Familiarity with generative AI models such like as GPT etc."

* **Resume:** While you have a "Microsoft Career Essentials in Generative AI" certificate and your sign

2. **PyTorch:**

* **JD:** "ML libraries such as TensorFlow, PyTorch, or scikit-learn."

* **Resume:** You list TensorFlow and Scikit-learn, but PyTorch is absent. While not strictly required i

3. **Explicit Statement of ML Concepts (Supervised/Unsupervised Learning):**

* **JD:** "Basic understanding of Machine Learning concepts including supervised and unsupervised learni

* **Resume:** Your projects clearly *use* supervised learning (e.g., training a CNN for recognition), bu

4. **Solid Foundation in Mathematics:**

- * **JD:** "Solid foundation in mathematics, including linear algebra, probability, and statistics."
- * **Resume:** As an ECE graduate, you undoubtedly have this foundation, but it's not explicitly stated i

2. Resume Improvements

Your resume is well-structured and impactful, especially for a fresh graduate. Here are some improvements to a

General:

- * **Tailor for Generative AI:** Re-read every section with the Generative AI Engineer role in mind. Emphasiz

Summary:

- * **Elevate Generative AI:** Start or heavily integrate "Generative AI" earlier.
- * **Current:** "Engineering graduate with hands-on experience building AI-powered applications..."
- * **Suggestion:** "Highly motivated Engineering graduate with hands-on experience building **Generative AI**
- * **Mention Key Certifications:** Briefly mention your Microsoft Generative AI certification here to immedia

Skills:

- * **Reorder/Regroup for Impact:** Move your most relevant skills (Python, TensorFlow, Scikit-learn, NLP/CV)
- * **Add "Generative AI" category:**
 - * **Suggestion:**
 - * **Programming & Query Language:** Python, JavaScript, SQL
 - * **Machine Learning & Generative AI:** TensorFlow, Scikit-learn, OpenCV, MediaPipe, Pandas, NumPy
 - * **Natural Language Processing:** (Implicit in project, but could be a sub-bullet here if you want
 - * **Web & Backend:** React.js, Node.js, Express.js, REST APIs, JWT Authentication
 - * **Databases:** MongoDB, MySQL
 - * **Visualization:** Power BI, Excel, Plotly, Matplotlib
 - * **Tools & Platforms:** Git, GitHub, Postman, VS Code, (mention cloud platforms if you have specifi

Projects:

- * **Intelligent Sign Language Interpretation & Translation:** This is your strongest asset for this role.
- * **Emphasize "Generative" Aspect:** Clearly state that the translation pipeline involves **generating** s
 - * **Current:** "Designed an NLP-driven English-to-ISL translation pipeline... built a full-stack web a
 - * **Suggestion (for 2nd bullet):** "Designed and implemented an NLP-driven English-to-ISL **translatio**
- * **Mention "Generative AI" explicitly:** If the underlying translation model involved any generative AI
- * **Add "Deployment":** You mentioned a full-stack web app, which implies deployment. Reinforce this. "D
- * **Other Projects:** While good for demonstrating general software engineering and data skills, consider sl
 - * **Example for ETL:** You can still keep it, but focus on the "data quality" and "pipeline engineering" a
 - * **Example for Serverless API:** Highlight its relevance for serving models or data for AI applications.

Education:

- * **Add Math Foundation:** Under "Relevant Coursework," you could add "Linear Algebra, Probability & Statist
- * **Suggestion:** Under "Relevant Coursework:" "Object-Oriented Programming, Database Management Systems,

****Achievements & Certifications:****

- * ****Highlight Generative AI Cert:**** Move the "Microsoft Career Essentials in Generative AI" higher up, possibly
- * ***Suggestion:** Make it the first or second bullet point here to ensure visibility.
- * ****AWS Cloud Practitioner:**** This is relevant for "deploying and maintaining AI models in production environments"

3. ATS Suggestions

To ensure your resume passes through Applicant Tracking Systems effectively, focus on keyword matching and clear

1. **Keywords from Job Description:**

- * Generative AI, Machine Learning, Natural Language Processing (NLP), AI technologies, AI solutions
- * Python
- * TensorFlow, (PyTorch - if you have any exposure, even minimal, add it to your skills)
- * Scikit-learn
- * Supervised learning, Unsupervised learning (mention these concepts)
- * GPT (if you've studied or used it, mention it)
- * Linear algebra, probability, statistics (mention these mathematical foundations)
- * Data preprocessing, feature engineering, model evaluation
- * Develop, implement, deploy, maintain AI models
- * Software development, programming skills
- * Bachelor's degree, Computer Science, Engineering (your ECE is fine)

2. **Strategic Placement of Keywords:**

- * ****Summary:**** Inject 3-5 high-impact keywords (Generative AI, Machine Learning, NLP, Python, TensorFlow)
- * ****Skills Section:**** This is crucial. Ensure ***all*** relevant keywords from the JD are listed here.
- * ****Projects Section:**** Use keywords within your project descriptions. For example, explicitly mention "
- * ****Education/Achievements:**** Ensure degrees and certifications are correctly listed.

3. **Use Specific Model Names (if applicable):** If your Generative AI certificate or any project covered spe

4. **Formatting for ATS:**

- * ****Standard Headings:**** Use clear, common headings like "SUMMARY," "SKILLS," "PROJECTS," "EXPERIENCE,"
- * ****Clean Layout:**** Avoid complex graphics, tables, or unusual fonts that can confuse ATS.
- * ****Font:**** Stick to professional, easy-to-read fonts (e.g., Arial, Calibri, Times New Roman).
- * ****File Type:**** Always submit as a PDF unless explicitly asked for a Word document.

5. **Reiterate "Supervised/Unsupervised Learning":** Even if implied, explicitly stating "Basic understanding

By incorporating these suggestions, Kaviya's resume will be even more targeted and effective for a Generative
